

Q8 Brahms XAD

Chlorine Free Metal Forming Lubricant

Product Description

Q8 Brahms XAD is a specially formulated, chlorine free metal forming lubricant. It is manufactured from a highly refined mineral oil that is blended with extreme pressure additives.

Applications

Q8 Brahms XAD is recommended for all kinds of thread rolling and metal forming giving excellent results on all types of metals including stainless steels, nimonics and tough alloys.

Q8 Brahms XAD has a high film strength and can produce substantial reductions in tool wear. Surface finish is improved on all materials and there are no misting or unpleasant odours from this product.

Q8 Brahms XAD also protects presses and tools against rust and corrosion.

Summary of Main Features and Benefits

- Suitable for all types of thread rolling machines
- Suitable for all metals including stainless steels and alloys
- Improved surface finish
- Increase in tool life
- Reduction in power consumption

Typical Inspection Data

Density at 15°C kg/m ³	920
Kinematic Viscosity at 40°C cSt	59
Flash Point (closed) (°C)	210

Health and Safety

Reference should be made to the relevant Q8 Material Safety Data Sheet before use.
